

HUGHES HYBRID DISTRIBUTION BOX

Hughes Hybrid Distribution Box is lightweight, compact and quick to install.

The hybrid box consists of a total of 11 Glands, 5 glands to support Hughes multimode hybrid fibres and 6 glands to support the single-mode fibres, with separate DC trunk.

Available with a transparent lid for instant inspection allowing effortless Auditing and troubleshooting.

LC bulkhead connectors are colour coded for easy identification and DC terminals are dual stacked for space saving.

The distribution box is secured with side latches as well as a single point security screw.

The universal mounting bracket ensures quick and easy fixing to most types of structures.
